

GLOVES

MANUFACTURING INDUSTRY POST-COVID

FOCUS ON COST COMPETITIVENESS ANALYSIS IN CHINA, THAILAND, VIETNAM AND THE US

DATE & TIME

2 Nov 2023

10am - 12pm

PLATFORM

Microsoft Teams

The landscape of the glove manufacturing industry shifted in the wake of the COVID-19 pandemic, as global demand, and glove prices, particularly in the medical glove sector, experienced a significant, rapid increase. In the post-COVID era, Malaysian manufacturers have encountered notable challenges. These include a steep drop in price from the pandemic's peak, oversupply of stock, decreased demand, surplus production capacity, and escalating energy costs. The evolution in the industry landscape has prompted Malaysian glove players to reassess and restructure the strategies, taking account relative strengths and weakness and the latest developments in comparison to key players in China, Thailand, Vietnam, and the United States.

MRC is pleased to invite industry members to participate in the upcoming market information seminar highlighting the cost competitiveness analysis in China, Thailand, Vietnam and the US for glove manufacturing industry post-Covid. The webinar will highlight findings of the study focusing on rubber gloves products from natural and synthetic rubber, and non-rubber by identifying the cost competitive analysis elements. Industry members will acquire insights on the ecosystem and growth of rubber gloves manufacturing industry in target countries post-Covid, cost of manufacturing rubber gloves for Malaysian companies, and understanding how the impact of recent changes in the manufacturing cost has affected the competitiveness of Malaysian manufacturers compared to the selected countries. **Do not miss the opportunity and join us by clicking below!**
