English

About the Webinar

The COVID-19 continues to aggressively affect the world population, causing a global pandemic. Millions are quarantined. We are facing global government lock-downs. Many organizations have discontinued businesses. Humans are facing inexplicable stress and mental health issues. As a result of disease outbreaks and pandemics throughout the recent past, this webinar is developed to serve as infectious disease preparedness and response planning guidance. The guideline is based on OSHA, CDC & WHO infection prevention and industrial hygiene practices and focuses on the design, development, and deployment of an infectious disease prevention at workplace.

This one-day course will be presented by two speakers. The first speaker will be Ir. Dr. Majahar Abdul Rahman from the Department of Occupational Safety and Health Malaysia. He holds a PhD in Public Health from Universiti Kebangsaan Malaysia. He is actively involved in the occupational safety and health policy development, enforcement and training activities in occupational hygiene and chemical management. He is the chairman of Committee for Mainstreaming Industrial Hygiene Under Strategy 4 Occupational Safety and Health Master Plan 2020, Technical Committee National Standard on Indoor Air Quality and Systematic Occupational Health Enhancement Level Programme Implementation Committee.

Our second speaker, Niki Gwee, is an accredited trainer from BSI Service (M) Sdn Bhd. He graduated from Universiti Teknologi Malaysia with a Bachelor Degree in Chemical Engineering majoring in Polymer Engineering and was awarded top student of Southern Region in 2008 by Polymer Research Institute Malaysia. He specializes in the provision of auditing and training services in the field of ISO 9001 Quality Management System, ISO 14001 Environmental Management System, ISO 45001 Occupational Health & Safety Management System, SA 8000 Social Accountability, Responsible Business Alliance Code of Conduct and ISO 22301 Business Continuity Management System.
