

Green Technology

Presented by :

Steven Ng

Hebe Rubber Products Sdn Bhd

Sunrise or Sunset?

The Problems

01

Used rubber products such as tyres, gloves .

02

Take hundred years to break down.

03

Release Toxic gas and green house emissions.

04

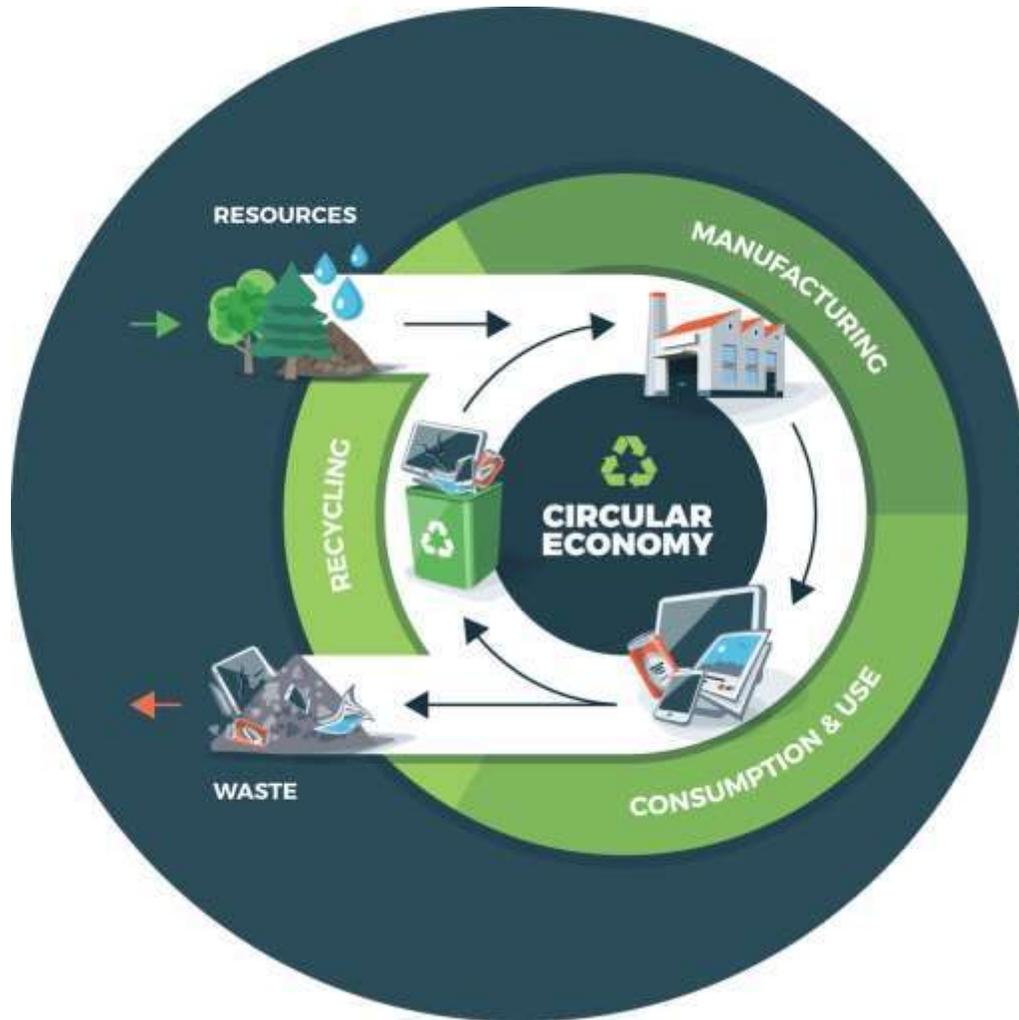

High disposal cost.

05

More landfills are needed to dispose these rubber.

The Solutions :

Circular economy :
Innovation that changes the way we operate in this world

Advantage of Recycling Technology

- ➔ Reduce cost of raw materials
- ➔ Reduce usage of natural resources
- ➔ Environment protection
- ➔ Competitive advantage

People, Planet & Profit

Gloves
Factory

Helps create jobs
in the recycling
industries.

Create green
products for global
demands.

Recycling
Factory

We assist the
gloves factory to
solve their disposal
rubber nitrile
gloves waste from
going into landfill.

We provide
another green
alternative to the
gloves factory.

Consumer

Consumers will be
more eco-
conscious and
more supportive
of eco-products.

Consumers get
value added green
products.

Mother
Earth

Converting waste
into useful and
eco-friendly
products would
also help mitigate
harmful
environmental
impacts.

Green Product & Environment Quality Performance

Process :

Patent Pending Technology
100% Nitrile Eco Compound
Non gas & water pollution
Reduce Carbon Footprint

Materials :

Lower S.G
Non toxic
Recyclable
Lower cost

Performances :

Oil Resistance
Non Marking
High abrasion resistance
Recyclable

Potential Green Products

Summary

We believe we can achieve this by working together.
