WHY CHOOSE RUBBER CATHETERS FROM MALAYSIA

A Strong Reputation

For over a hundred years, Malaysia has been a world leader in rubber. Today, Malaysia is the world's largest exporter of rubber medical devices, which include rubber catheters. A commitment to quality and continuous improvement over the years has made Malaysia renowned worldwide for its high quality and competitively priced rubber catheters.

High Quality

Malaysia is well known for high quality natural rubber latex and its products. The commitment to quality that is characteristic of Malaysian manufacturers makes Malaysian rubber gloves, condoms, latex threads and catheters the products of choice for buyers who seek quality, reliability and value for money. In the manufacture of catheters, constant attention to cleanliness and hygiene in the production process as well as in sterilisation ensures protection against infection and irritation during use.

Research & Development

Most Malaysian manufacturers of rubber catheters have research and development (R&D) capabilities. This ensures that their products are able to meet the changing needs of users and remain at the forefront of technological advancement. Additionally, all Malaysian rubber product manufacturers have access to the advanced R&D facilities of the Malaysian Rubber Board and the Tun Abdul Razak Research Centre in the United Kingdom for their R&D needs.

International Standards

Made-in-Malaysia rubber catheters are manufactured and tested to meet the requirements of the most stringent International standards. Catheters from Malaysia conform to standards such as ISO13485, BS EN 1616:1997 and MS 1369:1995 while all manufacturers comply with ISO 9001.

Product Variety

Manufacturers in Malaysia are able to produce a variety of catheters to meet specific needs of patients and to cater to preferences of clinicians. Most manufacturers are able to offer a range of sizes, a choice of material, natural rubber or silicon-coated, and various types including Foley catheters, Nelaton catheters and male external catheters. The wide range of products ensures that our catheters are able to provide maximum patient comfort.
