

MAXIMISING COST EFFICIENCY IN PRODUCING GLOVES

AUTOMATION

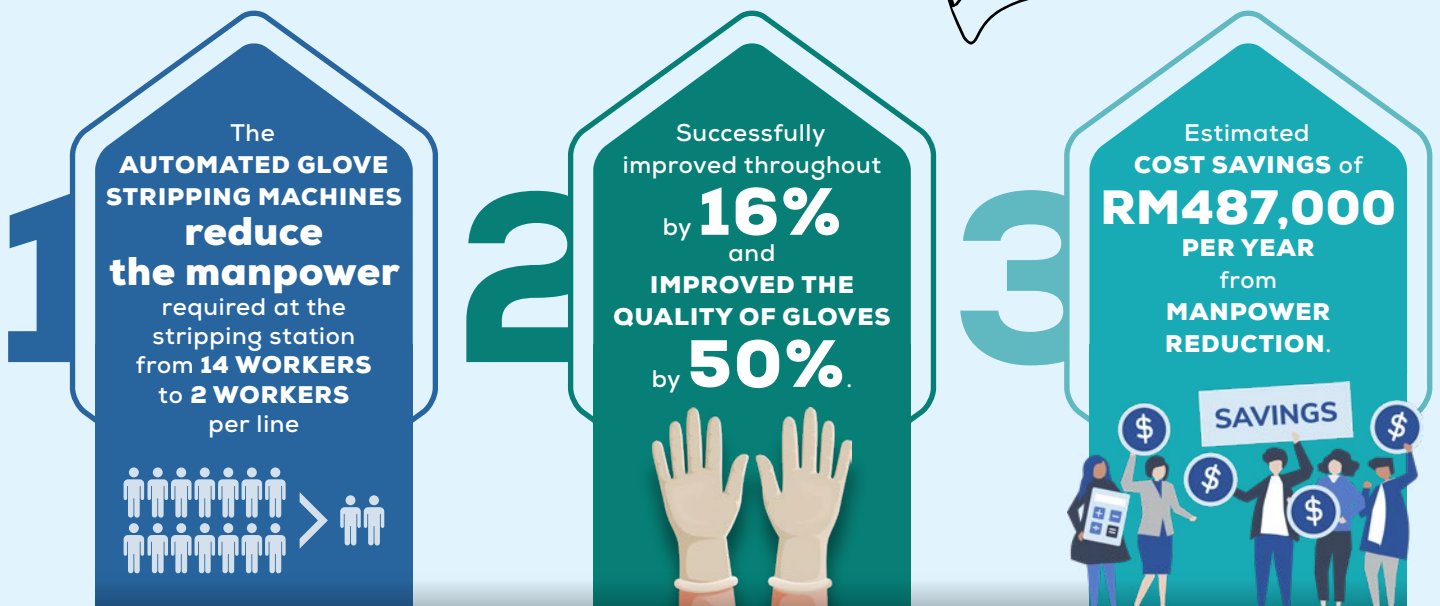

BRIGHTWAY HOLDINGS SDN BHD

A key latex glove manufacturer that produces nitrile, latex and neoprene gloves, **BRIGHTWAY HOLDINGS SDN BHD** purchased Auto Stripping Machines via the FAGT grant incorporating HMI screens with a PLC to monitor and ensure tasks such as auto counting of stripped gloves, preventive maintenance schedules, machine positioning, cuff brush control and auto glove collector control, functions properly.

The machines also have an auto by-pass clutch system, which will help to engage & disengage the main conveyor chain synchronisation without having to stop the dipping line, to reduce the downtime for service and maintenance.

Through the implementation of this system, the company is able to achieve the following results:

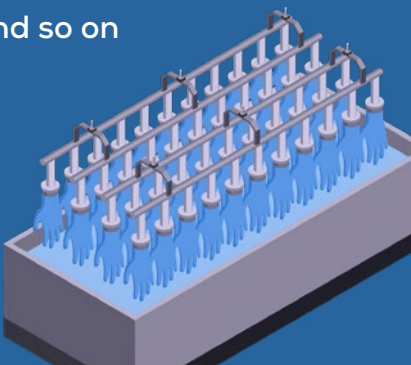

Through the usage of automation, the company is able to streamline its long-term cost while maximising efficiency and improving the quality of the products.

Brightway Group comprises of Brightway Holdings Sdn. Bhd. as its Corporate and Administrative Centre, Laglove (M) Sdn. Bhd. and Biopro (M) Sdn. Bhd. as its main production facilities. The group has a total of **52 LINES** and is capable of producing **340 MILLION GLOVES PER MONTH**. With a **TOTAL WORKFORCE OF 2500 PEOPLE**, Product Innovation & Process Improvements help satisfy their customer's needs and maintain their status as a Premier and Niche Market Glove Manufacturer.
