

ACHIEVING HIGHER QUALITY WATER FOR LESS

WATER TREATMENT

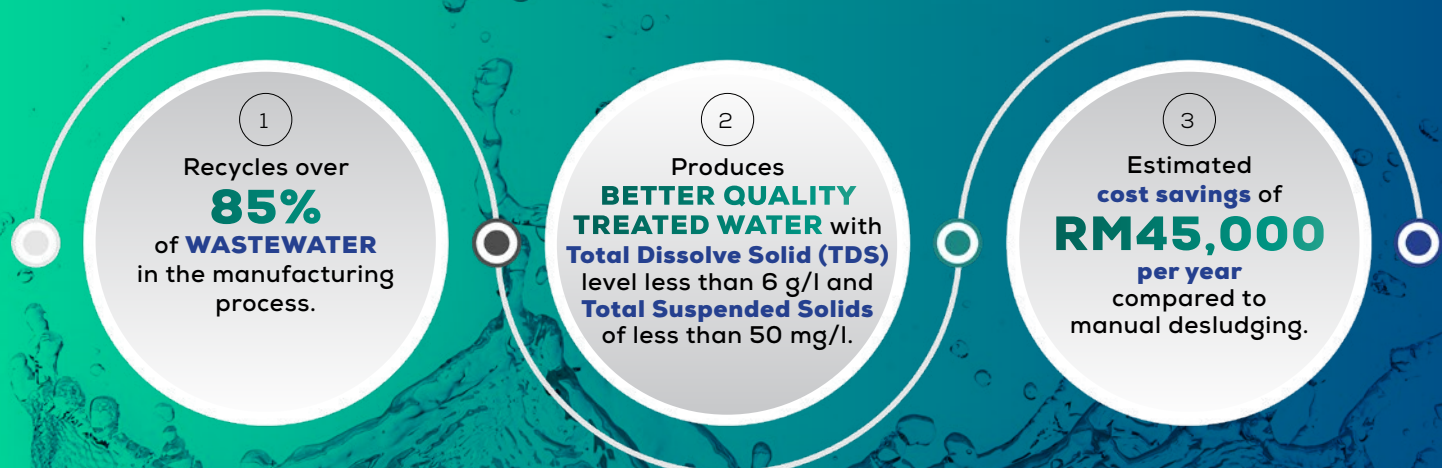

HOCK HIN (MUAR) RUBBER CO. SDN BHD

HOCK HIN's wastewater recycling treatment plants consists of two systems:

The recycled treated water is used at the wet processing line for cleaning and washing of rubber cuplumps.

Through the FAGT initiative, the company was able to implement the two above systems and achieve the following results:

HOCK HIN (MUAR) RUBBER CO. SDN BHD
