

FAGT SUCCESS STORIES

Soaring Higher with Solar

Medical Rubber Products Sdn Bhd is another FAGT recipient that successfully migrated to solar energy where they installed 301 rooftop solar photovoltaic (PV) panels for a total installed capacity of 140kWp that created estimated annual savings of RM80,000.

MRC trusts that sharing of the success stories will inspire other candidates to adopt similar RE investments that can be scaled proportionately to meet their unique needs while alleviating the market's climate change concerns and satisfying renewable energy expectations.

Medical Rubber Products Sdn Bhd: Installation of Solar Photovoltaic Panels

Established
1982

Location
**Sungai Lalang,
Kedah**

Workforce
**60
employees**

SPECIALTY: Custom Manufacturing Rubber molded products (rubber bushing, rubber grommet, rings, rubber seals) and extrusion products (rubber foam cord, rubber tubing, extrusion profile, door seals).

EXPORT MARKETS: Vietnam, New Zealand, USA, UK, China, and Poland.

PROJECT OBJECTIVE: Installation of 301 rooftop solar photovoltaic (PV) panels for a total installed capacity of 140kWp to utilise renewable energy and reduce electricity cost.

VALUE OF FAGT FUNDING:

RM182,000

or a 50% grant for the total project cost of **RM364,000**

COMPLETION DATE

July 2022

PROJECT ACHIEVEMENTS

RM80,000

estimated annual savings or approximately **RM6,700** savings on monthly electricity bills.
